# TO THE READERS.

**W**E are now in expectation of some prodigious Catastrophe, which either this very Year, or suddenly after, may happen amongst us, from the Influence of the threesfold Conjunction of Saturn and Jupiter in Leo in 1682. and this present Year 1683. together with the two late Comets that have been seen in most parts of Europe; for Comets have their Influences usually concomitant with other Celestial Configurations of the Planets: Nor do they so powerfully Operate without the concurrence of some preceding or subsequent cause or matter, as Conjunctions of the Superiours, Eclipses, and other notable Aspects of the Celestial Bodies—Comets in Astrological Judgments have next to the Planets the greatest Influence; according to that of Ptolomy, Aph. 98. and we have had experience sufficient to confirm it, That Comets, Blazing Stars and such like prodigious Phenomena's have their manifold and certain Influences upon the generality of mankind, as well relating to Kings and Princes as unto the commonalty of People, of which Examples might be given very ample and convincing—But what the All-disposing Providence of God has now determined, let us patiently wait for, and submit to his Divine will and pleasure——

We have for some few years past labour'd under strange considerations amongst our selves, and now, I hope, begin to be moderately well compos'd and settled again, I pray God continue it; and yet such is the petulant humour of most people that they still expect a sudden storm should break out amongst us although they know not how, nor from whence; and thereby torment themselves with many vain fears and jealousies: But thanks be to God, we are at present at Peace, and every man enjoys the benefit (or fruit) of his own labour and industry.

## To the Readers.

As for Sickness or some general mortality, that, indeed we may justly fear, either in this or some ensuing years, in regard of those Celestial Monitors aforesaid, that have lately appeared amongst us, who are usually the Prodromi of such like Calamities to mankind; yet who knows but it may please the Almighty to spare us for some years—— However, let us not rest secure, but endeavour to prepare and fortifie our selves against the worst that can happen; and in the first place let us labour to love one another, and live in peace and unity; let not the thoughts of Death affright us; for we all dayly suck in fresh Air, and breathe it out again, and thereby demonstrate that our very being is but the Emblem of Mortality—— Lastly, Let us not forget to pray for the long life and Reign of his Sacred Majesty, for in the Prolongation and continuacion thereof, consists the safety and happiness of all his Loyal, loving, and honest Subjects——

To conclude, This years Anglicus is furnished (we hope) with fit matter, and all things proper and convenient for such a work as formerly it has been, which we recommend to the serious perusal and candid reception of all persons, and doubt not but it will be as well accepted, as those of former Years from the hand of,

From my House in  
Baldwins Court in  
Baldwins Gardens,  
Octob. 6. 1682.

Gentlemen!

Your faithful Servant

HENRY COLEY.

## *Astrological Judgments*

And Observations for the Year 1683.

*Hic ergo est usus verae Astrologiae, ut multorum effectuum qui in terris sunt causas quae in caelo sunt, agnoscat; aliquando etiam antequam sunt, ipsos effectus in suis causis praevidat: i. e.* This is therefore the use of true Astrology to understand from it, the Causes which only are in Heaven, of many Effects which are on Earth; and sometimes long before they come to pass, that we may prevent the effects themselves in their causes. *Zanchius de Astronomia.*

**W**E are now arrived to the (so long expected) Year of 1683. wherein very notable transactions in Europe have been much talk'd of by many curious and inquisitive persons; and now we may doubtless see the event. We shall therefore endeavour (by the Assistance of the Almighty) in this our writing, to give the world some satisfaction what in all probability may be expected as to the various contingent Actions in the general affairs of all Europe. — Yet we are not ignorant that whosoever attempts to Prophesie, or judge effectually of the great Actions and Transactions of any Kingdom or Country Astrologically, (though in the most calm and tranquil time, when no storms or distractions are visibly approaching) he shall not only labour hard, with much study, and pains, to compose the work; but after 'tis publish'd and emitted to the world (let it be never so excellent in its self, or beneficial and useful for the publick) he must certainly expect to undergo the harsh censures, aspersions, and scoulds of the vulgar and ignorant sort, as well as of those persons of a far

*Astrological Judgments, 1683.*

higher degree and quality, (such is this critical age we live in) which (among many other disadvantages) is a very poor encouragement for a Student to write: And this we have sufficiently experimented of late years, both in our own *Annual writings* as well as divers others, who have taken much pains to oblige the world in their *Astral Predictions*, but to small purpose——

Now we admire how any indifferent or reasonable man can offer or undertake justly to gain-say or condemn these or such like Artificial and Practical Experiments in the foresight of future Events and contingences, from Natural Observations and experience it self, or deny or disallow the laudable and lawful use of *Astrology*, in such *Prenotions* or conjectural Predictions as are here collected, and Annually presented to publick view. We say all Observations and Conjectures *Astrological* are framed according to the course of Nature, and so are *Contingent*; and therefore *may be*, or *not be*, as the Almighty pleases; who sometimes, according to his Divine will and pleasure (perhaps for our sins) alters the course of Nature, and thereby frustrates the conceits, intentions, and expectations of mortal men: Therefore, in short, when we *Predict* from the various configurations or conjunctions of the *Planets, Comets, Eclipses, &c.* That such and such Accidents will happen in any part of the World; understand it with this caution, *viz.* That such *Positions* or Appearances in the Heavens do foreshew, and incline, (God permitting) such and such calamities or sudden changes, Judgments, Sicknes, Dearths, &c. in the world: For this is most certain, God rules all by his *Providence*, and that the *Stars* by his permission are Instruments, wherein many *Contingents* may be (and are frequently) foreseen as experience abundantly testifies—— *Nam quicquid experientia optima, rerum Magistra, consentit, retinendum est; quicquid vero ei repugnat, rejiciendum.* This being premised, we shall now proceed to consider the Affairs of the Year; and in regard there appeared another *Comet* in August 1682. we will present the Reader with an *Ephemeris* thereof as it

was

## *Astrological Judgments, 1683.*

was observed in London, by an able hand; as also an *Ephemeris* of the late terrible Comet in December 1680, as it was observed in Germany; together with a *Catologue* of all the Conjunctions of Saturn and Jupiter through the four *Triplicities* for many years before Christ, and till their next entrance into the *Fiery Triplicity*, calculated lately from the *Caroline Tables* by my friend Mr. John Holywel, Teacher of the *Mathematicks*, who has now in the Press (and will shortly be made publick) his *Catastrophe Mundi*, wherein he Treats of Conjunctions and Comets at large, to which are added, engraven in Copper Plates, many Hieroglyphicks, representing the various changes of the world for many years to come: Sold by the Booksellers of London.

---

There are already published several Sheets, Intituled, *A Collection of Letters, for the Improvement of Husbandry and Trade*, by John Houghton Fellow of the Royal Society; And 'tis his design to carry it on, by publishing a Sheet about once a Month. Now if any generously minded will send any Remarkables to the Author, in St. Bartholomew's Lane, behind the Exchange, 'twill be kindly accepted, and all honour shall be done them.

Here appears some small difference between these observations and those at Erford in Germany, which is occasioned (I suppose) by the different hours of the night they were observed, which is not expressed, also the difference of Meridians and want of diligence in observation, &c.

Here

# Astrological Judgements, 1683.

Here follows an *Ephemeris* of the last Comet in *August* 1682. as it was most accurately observed by my loving friend and old acquaintance Mr. *John Colson* Professor of the *Mathematicks* near to the *Hermitage-stairs*, not far distant from *London*.

August 1682.		Ephemeris Cometæ.							
		H	M	Longitude.			Latitude.		
Days.	16	11	47	0	54	♏	29	19	N.

Sept.	1	7	34	20	26	♏	15	12	N.
	4	7	20	25	38	♏	12	23	N.

There will very rarely be found any account but this of the late Comet, in the *Almanacks* for 1682. in regard it appear'd so late in the year—— 'Twas seen at *Bristol* by a Gentleman, Mr. *J. C.* who gives this Account, *August* 16 1682. This morning, at Two of the Clock, 'twas my chance to observe a Comet (which I have some reason to believe hath not been seen in these parts before.) The Star at Two of the Clock appear'd in, or near, the *North East* point, about 23 degrees high, and something bigger than a Star of the first Magnitude; with a Tail about 3 or 4 degrees in length, pointing upward, tending a little *Eastward*, and not very conspicuous—— And from *Paris* the *Gazette*, *August* 21. gave this short Account, viz. *August* the

*Astrological Judgments* 1683.

the 12. Last night a *Comet* appeared in 7 degrees of the *Tropick of Cancer*, having a long waterish Tail, pointing to the *South-West*, the *Star* descending to the *North-East*——  
'Twas observed also in *London* by a Friend of mine, *Munday August 14. 1682.* about Nine at night North and by West, its place near the right Paw of the *Great Bear*, being in Longitude then about 25 degrees of *Cancer*, and about 30 degrees of *North Latitude*, the Tail pointed then to the *South-East*, and the *Star* about the bigness of *Venus* in her greatest *Elongation*; 'twas very swift in motion, as may be seen by the aforesaid *Ephemeris*; and at its first appearance seen immediately after *Sun-set*, but in that place of the Heavens, did neither Rise or Set. 'Twas seen also in *Leicestershire* by a worthy Friend of mine; and in most parts of *England*, whereof no more need be said to confirm it.

In the next place we present the Reader with an exact Catalogue of the *Conjunctions* of *Saturn* and *Jupiter* through the four *Triplicities* for many years past and to come, more correct than those formerly published, and of which good use may be made. But more of this in the sequel.

# Astrological Judgments, 1683.

A Table or Catalogue of the *Conjunctions* of the Superiour Planets *Saturn* and *Jupiter* through the four *Triplicities* for many years past and to come, exactly calculated (to years) from the *Caroline Tables*, by *J. H. Philomat.*

The

## *Astrological Judgments, 1683.*

The Astrological Reader needs no Information, That of these *Conjunctions* of *Saturn* and *Jupiter*, there be three kinds, *viz.* *Great, Mean, and Lesser Conjunctions*, of which we have Discours'd at large in our *Prophetical Merline*, pag. 55. but to satisfie others which perhaps never saw that Book, we shall briefly explain this matter thus, 1. *The great Conjunction* is that after a full period and Revolution of the whole Circle: That is when *Saturn* and *Jupiter* have made their several *Conjunctions* throughout the four *Triplicities*, and do again meet in *Conjunction* in the first, which is usually accounted the *Fiery Triplicity*, and accomplished in 794 years and some odd days, as may be seen by this Table; for if you substract 3164 from 3958, there remains 794 years, that is the years of these Planets third meeting in the *Fiery Triplicity*, out of the years (*Ante Christum*) of their first, and so in the rest.

(2.) *Mean Conjunctions* are those, which are made after the leaving of one Sign and conjoining in another succeeding *Triplicity*; as from *Aries, Leo, Sagittary*, which is the first; into *Taurus, Virgo, Capricorn*, the second; thence to the next *Triplicity*, *Gemini, Libra, Aquarius*, which is the third; and lastly, into *Cancer, Scorpio, and Pisces*, the fourth *Triangularity*, which is accomplished in 199 years, odd days; and thus if I substract 15 years *Anno Christi* (being the sixth Entrance of *Saturn* and *Jupiter* into the *Fiery Triplicity*) out of 214 years *Anno Christi* (*viz.* when those Planets entered the *Earthly Triplicity*) there remain 199 years, as appears by the Table in this and several other examples of like nature, which is obvious to any intelligent Reader.

(3.) But the *lesser or least Conjunctions* of *Saturn* and *Jupiter*, are those which happen or fall in Signs of the same *Triplicity*, and in these the *Superior Planets* do meet, or are conjoined once in about 20 years, and sometimes but 19; and thus by the Table 'tis apparent they make only ten *Conjunctions* in one and the same *Trigon*, and consequently 'tis near upon 200 years before they change their *Triplicity*,

city, which is almost 800 years before they compleat their Revolution through the four *Triplicities* or the whole Circle.

(4.) Those that have taken the pains to try by Calculation to find the true Distances of Time between one *Conjunction* and another, since their last return into the *Fiery Trigon*, do find so much variety that no certain rule can be made, but it must still be performed by Calculation—— As for example, from the 7<sup>th</sup> of *December* 1603, the time of the first *conjunction* in *Sagittary* (at the last return into the *Fiery Trigon*) to the 7<sup>th</sup> of *July* 1623 (*viz.* the time of the second *Conjunction* in *Leo*) is 19 years 212 days, and from thence to the 16<sup>th</sup> of *February* 164 $\frac{2}{3}$  (the time of the third *Conjunction* in *Pisces*) which should have been in *Aries* is 19 years 224 days, and thence to the 4<sup>th</sup> *Conjunction* *October* 10. 1663. 20 years 236 days, and from thence to this last in *October* 1682. 19 years just; but considering there fall two *Conjunctions* more of these *Planets* this year, in *Leo*, the first a *Retrograde Conjunction* in *January*, and another in the same Sign by a *Direct Motion* in *May* following; we affirm this very *Triple Conjunction* the more significant because the like has not happened in *Leo* (as can be readily discovered) since the Creation of the world, and therefore we may rationally judge its Effects must be the more stupendous and admirable—— and the more amazing in regard 'tis ushered in with two notable *Comets* which never appear in the Heavens, but as the *Prodromi* of some signal *Catastrophe* approaching, or Judgment impending; but usually more in some Kingdoms and Countries of the World than others; those *Conjunctions* of the Superior Planets which fall in the Sign *Aries*, are in their Effects most universal, &c. Those in *Leo* have more Influence upon the North, or North Eastern parts of the world; and those in *Sagittary* chiefly respect the Southern or South Eastern parts—— The *Conjunctions* of *Saturn* and *Jupiter* do certainly convert and change things in the world, and the observations of all Ages are testimonies sufficient to confirm it: Nay even  
in

## *Astrological Judgments, 1683.*

In our own Age we have been eye witnesses that very eminent Transactions have succeeded such *Celestial congresses* and *Phenomena*.

(5.) 'Tis worth our Observation, to consider, that all the Conjunctions of *Saturn* and *Jupiter*, at their Entrance into the *Fiery Trigon* since the Creation, have ever been in the Sign *Sagittary* (not *Aries*) as appears by calculation; there may be a secret mystery herein, for *Sagittary* is the great Dignity of *Jupiter*—— who is the Patron of Justice, Peace, Tranquillity, Religion, &c.—— and here we might *Paraphrase* a little.

The first Conjunction of these Planets in the *Fiery Triplicity* was *Anno ante Christum* (as appears by the Table) 3958, in the beginning of *February*, in 8<sup>d</sup> of *Sagittary*, and this was not many years after the worlds Creation, as 'tis generally supposed by the Learned: *Bishop Usher* in his *Annals* makes the beginning of the world to be 4004 years *Ante Christum*; which if so, 'tis 46 years after the worlds Creation.

The second Conjunction was (in this *Trigon*) in the year before Christ 3164, (as may be seen by the Table) 'twas in the beginning of *November*, that is 794 years 8 months distance; and this Restitution fell in the 5 degree of *Sagittary*, which happened (as appears by Chronology) in the days of *Enoch* and *Methuselah* who was Born to *Enoch* when he was 65 years old 3317 years before Christ.

The third Entrance (though second Restitution of this *Trigon*) was 2370 years before Christ (as in the Table) and it fell in the latter end of *December*, in 8<sup>d</sup> of *Sagittary*; the distance of these two Returns is 794 and near 2 months— This was in the second Age of the world, and the universal Deluge, called *Noah's Flood* happen'd 2349 years before Christ; but the next year after there was a Conjunction of *Saturn* and *Jupiter* in *Leo*: So that 'tis certain 'twas during the Conjunction of the Superiors in the *Fiery Triplicity*, and now the years of mans life were made (as it were) half shorter than they were before.

## *Astrological Judgments, 1683.*

The Fourth Entrance (though third Return) was Anno ante Christum 1575. (as exprest in this Table.) There happened three Conjunctions in this Trigon. The first was about March the 12th in 9. degrees of Sagittary, the second was a Retrograde Conjunction which fell about the 20th of May in 8. degrees of Sagittary, and the last about the 26th of September following, in four degrees of the same Sign; this was in the third Age of the World, about the time that Moses and Aaron flourished, and King Pharaoh exercised his Cruelty in Egypt, also the Children of Israels delivery from the Egyptian Bondage, &c.

The fourth Return, but the fifth time they entered this Trigon, was (as appears by the Table) 781. years before Christ about the beginning of December in 13. degrees of Sagittary; about this time the Ten Tribes were led into Captivity, this was in the Monarchy of the Medes; and some few years after this Conjunction we may read that Sennacherib King of the Assyrians, having 185000. of his Souldiers slain by an Angel, leaveth the Siege of Hierusalem and fleeth away, but presently after is slain by his Sons Andrammelech and Sharezer, 2 King 19. 37. About this time lived Habakkuk the Prophet —

The fifth Restitution, but sixth entrance was in the 15th year of Christ, (as the Table exhibits) 'twas about the beginning of December in 12. degrees of Sagittary. Now Tiberius the Emperour begins to flourish, and Augustus died; under this Conjunction also was the Passion and Resurrection of our Saviour, and many other memorable things performed in the World, as History relates.

The sixth Return, but seventh entrance, was in the year of our Lord 809. about the 20th of October in 6. degrees of Sagittary, about this time Reigned Charles the Great, and in the year 814. after Christ, he died at Aquisgrane, January 28th, and now the Western Empire is translated to the Germans, &c.

The seventh and last Return (though the eighth entrance) was in the year 1603. December the 7th in 8. degr. of Sagittary, and under this Trigon we Mortals, and our

## *Astrological Judgments, 1683.*

Successors, must content our selves to labour for at least another Age, *viz.* till the year 1802. as may be seen by the Table. — (If the World continue so long.)

(6.) And it is well known to all *Europe*, that many eminent Changes and Mutations have happened therein, since this last Return of *Saturn* and *Jupiter* into the *Fiery Triplicity*, of which a large Volume might be written — We are, and must long continue under the *Dominion* thereof as aforesaid, and therefore 'tis no strange thing to see and hear daily of so great alterations in several Kingdoms and Countries of the World, which perhaps no Age can parallel — chiefly arising from *Religious* pretences and unhappy differences therein, also Breach of *Leagues*, Antient *Customs*, Just *Priviledges*, long enjoyed *Rights*, &c. which the people (of *England* especially) will never bear — It has been observed that the Planet *Saturn* never passes through the sign *Leo*, but he by his evil Influence therein, leaves some considerable impression upon the City of *London*, he entered that sign about the beginning of *August*, 1681. and continues *Direct* and *Retrograde* therein till the latter end of *September*, 1683. what considerable differences arose in the City concerning their *Charter*, 1682. the Election of *Magistrates*, &c. We need not repeat, and what this Year, 1683. may produce, let us patiently wait to see the event. *Sickness*, and that the most dreadful and dangerous is very much feared and expected, from which let us all pray, *Good Lord deliver us*. We say, In our time we have observed that those *Conjunctions* which have succeeded since 1603. in the *Fiery Triplicity*, have not been attended with happy or propitious successes to *England*, or the City of *London*, as formerly we intimated in our *Anglicus*, 1677. and briefly again in that of 1681.

(7.) Now since so much publick Discourse has been made lately concerning those our Predictions (which have many of them unhappily been too truly verified) we think it convenient once more to repeat the heads thereof for their sakes which perhaps never saw them; which take as followeth,

### *Astrological Judgments, 1683.*

followeth, — Now as to the time of manifestation when these so wonderful *Mutations* or *Revolutions*, shall be effected, or visibly declared, or put into action, we say, that although in part some breakings out there are in *esse* at present, yet the most violent actions and dreadful concerns shall not have full manifestation or perfect appearance until three times ten years added to 1669. do come, which will be the year 1699. — Weighty matters require many years for their performances, yet in the mean time the powerful Configurations of the *Superiour Planets*, the remaining Influences of the *Comet* or *Comets* in 1664, and 1665. as also of that in 1673. (to which now may be added that dreadful *Comet* in December 1680. and that in *August* 1682.) have in some measure begun those effects, which will in convenient time be more apparent long before the year 1699. — In the year 1682. and Month of *October*, about the 20th day, there will be a *Conjunction* of the two *superiour Planets*, *Saturn* and *Jupiter*, in about 20. degrees of that Regal Sign *Leo*, which is the *Terms* of *Jupiter*, and wherein he and the Sun have their *Triplexity*, it will be the fifth time of their meeting in the *Fiery Triplexity* since their *Conjunction* in 1603. at which time they changed one *Triplexity* and entered into another (as appears by the Table) which usually (if we may credit Antiquity, Experience, or History) hath not happened without considerable *Revolutions* and *Changes* in the *World*, according to the nature of the Sign and Planet most essentially fortified, were it possible to obtain the *Scheme* thereof, therefore 'tis best to consider well the *Schemes* of the *Lunations* preceding and subsequent, and in what part of the *Heavens* the two *superiour Planets* are posited, and accordingly deduce Judgment according to Art, and the happy Dictates of a pregnant *Genius*.

We have observed, that those *Conjunctions* never pass over without very notable and signal effects in many places of the *World*, &c. At the entrance of these Planets into the *Fiery Trigon* Queen *Elizabeth* died; in 1603. a great Plague was

### *Astrological Judgments, 1683.*

in London; and in the year 1623. the second Conjunction of these superiour Planets fell in the 7th degree of *Leo*; not long after *King James* (a Peaceable and Wise Prince) died. Again in the year 1625. at least 50000. persons died of the Plague in London. In a short time after follows the unfortunate business or attempt of the *Isle of Ree* in France, the Murder of *Buckingham*; &c. and during all that time a general Murmuring and Repining of the common People, especially amongst those of different Judgments, which gave encouragement unto, and was the occasion of our late unhappy Troubles, and Intestine (or Civil) Wars in England.

In the Year 164<sup>3</sup>. in February, the third Conjunction of *Saturn* and *Jupiter* was celebrated in 26. degrees of *Pisces*. But the effects most concerned those people subject to the Sign *Aries*, upon this Conjunction our late unhappy Calamities began, which more or less continued till the year 1652. In that intestine and bloody War, many thousand persons of all Degrees and Qualities, miserably suffered, and the City of London especially in her Trade and Commerce, with many other strange accidents which are yet fresh in every mans memory. But what is most remarkable after the year 1663. was that in 1665. viz. The greatest Plague that ever happened in London, wherein 'tis credibly reported at least one hundred thousand people perished, and besides in the year 1666. that terrible and never to be forgotten Fire which destroyed the greatest part of that Famous and Flourishing City; and these Calamities followed the Conjunction of *Saturn* and *Jupiter* in the Sign *Sagittary* of the Fiery Trigon, Anno 1663. — But what manner of accidents shall follow this present Conjunction in *Leo*, we are now subject unto? (which began October, 1682. and attended with two terrible Comets.) 'Tis one hundred and ten years since the Mock Star, 1572. 79. years since the great Conjunction of *Saturn* and *Jupiter* in *Sagittary* 1603. and 17. years after the appearance of the Comet in 1665. whose Tayl extended fiery and large towards the East part of Heaven, the effects whereof we judg are not yet in being, but will

*Astrological Judgments, 1683.*

will in part be put forward in or about 1682. or something later, with an heavy vengeance or judgment on those People and Nations, Providence shall dispose the effects to fall upon by Wars, Famine, Death of Cattle, several Mortalities, Barrenness of the Earth, and Cruel Destruction of Mankind.

(8.) Those pretending to Religion or such as are famous for *Schisms, Heresies*, or of different Judgments, from the Profession of that Religion which is established by Authority, will for some years grumble and repine for that restriction of or upon their Consciences (as they will term it) and the nearer to the time of the *Conjunction* the more Confederates they will have, and either near the time of the *Conjunction* in self, or a little after, we fear great disturbance, of those Nations and the Princes they live under, disquieting their Governours, this for Conscience sake as they pretend. But in our Nation (as before was exprest) breach of the Peoples Just Priviledges, Ancient Customs, and former enjoyed Rights, will animate the generality to a strong and sturdy Rebellion, and countenance that Translation of *Monarchy* mentioned by *Trithemius*.

Certainly you Princes of Italy, as also the *Roman Pontifex* or *Conclave of Cardinals* of the *See of Rome* will all of you find great and most grievous distempers in your Governments near the time limited; so will many People and Nations subject to the *Pierry Triplicity*, and this evil will be the more inflicted or aggravated in those Kingdoms or Governments subject to the Signs *Taurus*, *Leo*, *Scorpio*, (that *He-Gorean Treacherous Sign*) and *Aquary*, (a Humane Airy Sign) the names of those Countries subject to these Signs you may find in my *Christian Astrology*, or in *Clavis Astrologie elimata*, Emittid to the World by *Henry Coley*, several Years since.

Many believe the last Age of the World is at hand, we verily conjecture that a troublesome and vexatious time is approaching upon most Nations of *Europe*, wherein those pretending to Religion, whether *Papists* or *Protestants*, will

### *Astrological Judgments 1683.*

shew little mercy or compassion to those persons whose unhappiness it will be to fall under their subjection; of which we might give precedents very ample.

The *Coadunation*, (or *Conjunction*) of so many Planets in the sign *Leo*, in the year 1682. gives us very rational grounds to predict the appearance of another Comet; very strange Apparitions in the *Air* or some prodigious *Meteors*, either preceding that *Conjunction*, or subsequent in a short time after. This was verified almost to Admiration in the Appearance of the late dreadful Comet 1680. in *December*; but more particularly by that which was seen in *August* 1682. not full two Months before the *Conjunctions* of *Saturn*, *Jupiter* and *Mars* in *Leo*, in *September* and *October* following—Lastly, and we are also fearful that some more than ordinary Fire, or Fires, may afflict or do considerable damage to many Cities of *Europe*: God keep this Judgment from the City of *London*, and Bless her Inhabitants with much Health, Peace, Tranquillity and Prosperity; and preserve and deliver her from another Plague or Pestilential Distemper for future Years, *Amen*.

Remember the Terrible Fire at *Wapping*, *November* the 19th 1682. also those in some other parts of the World, which we hear have been most dreadful.

(9.) We proceed now to the consideration of the state of the Year; but first shall give the Reader an Account of a Prediction or two, concerning the Dreadful Inundation which happened in *Holland* about the latter end of the year 1681. or beginning of 1682. whereby the Inhabitants of that Country received as 'tis reported (too certain) at least ten Millions Sterling damage by a violent Inundation occasioned by very strong Westerly Winds, as the *Gazets* will inform you more at large of all the particular circumstances thereof, viz. In our *Anglicus* for 1681. upon the Figure of the Suns Ingress into *Aries*, you will (1.) find these words—Many Difficulties and great Calamities befall such poor men who labour in *Mines*, either for *Coals*, *Tin*, or *Lead*; the same may be said of *Fishermen* in  
England

## *Astrological Judgments, 1683.*

England or Holland, for such persons shall be very unsuccessful in their indeavours, and meet with many considerable Losses and Crosses, perhaps beyond their expectation, occasioned by stormy Winds, which must be expected both at Sea and Land. God divert a Plague from our Native Soil, — &c. (2.) Upon the Judgment of the *Lunar Eclipse* in August, 1681. you have these Words — Sudden and unexpected Deluges, or Inundations of Rivers, overflowing the Sea Banks in many places, to the great damage and utter ruine of those poor People or Inhabitants, whose ill Fortune it is to live near those Irruptions of the Sea: Also great prejudice to the Trade of Fishing, or amongst Fishermen in general, and sometimes many stately and ancient Buildings demolished or defaced: and this Judgment may in all probability be in part made good in some *Cities* or *Towns* in *Flanders* and *Brabant*, or in some of the *United Provinces of Holland*. And again in the next page but one, 'tis thus written — We may expect to hear of the casual drowning of many persons from several parts of the World, some by Shipwracks, others by accident, much damage by overflowing of the Water, much plundering and ransacking of Towns, &c. In this sad disaster there were many poor people as well as others, casually drowned, notwithstanding they got upon their Houses to preserve their lives; there was much loss and damage also by ransacking of Houses, &c. in so great a consternation and confusion, some part also of this *Prediction* was too truly verified near our own *Nation*, or between us and *Scotland* in 1682: and still very fresh in every mans memory. Now these things we repeat to convince the incredulous, that notable things may be *Predicted* by *Astrology*. Many other Examples might be given, but let these satisfy the most *Curious* and *Critical* Persons at present, who may be presented with more variety hereafter, if occasion be. In the mean time let us submit to *Divine Providence*, whatever is portended: For we should know, That there is nothing casually happens here on Earth, but what is absolutely

lutely decreed by the Great God of Heaven, and is also ordered and disposed at his good will and pleasure.

(10.) 'Tis more than probable, that this, and some ensuing Years, we may see very eminent and no less remarkable contingents in mundane affairs, more particularly in the *Kingdoms and Countries of Europe*. For *Time* always hitherto has produc'd plenty (and no less variety) of innovations in the World; and if *History and Chronology* may be credited, all Ages upon the various returns of the *superiour Planets*, &c. have had their prosperous and happy, as also their cross and adverse seasons—And by the precedent Catalogue of *Conjunctions*, those *Students* that will take the pains to consider of the *general Accidents* of the *World*, and are also furnished with *History and Chronology*, may thereby find a *Radix or Epocha*, to discover under what *Triplicity* all famous *Actions, Kingdoms, Monarchies, Cities, Royal Families*, &c. had their Original, either then or near those times, and thence be able by a serious scrutiny and judicious consideration, to make a probable conjecture of the debility and decay thereof; and thus we find the *Invasion of William the Conquerour*, to be about the time the *superiours* returned into the *Earthy Triplicity*, and succeeded about sixty years after. The *Saxon Line* was restored at their return into the *Airy Triplicity*: The *Families United*, under the *Watry*; and the *Union of the Kingdoms of England and Scotland*, &c. under the *Fiery Triplicity*, which continues at least an Age yet to come.

(11.) And here observe, that all the *Conjunctions* of the two *superiours* work more effectually when they concur with great *Eclipses, Mock-Stars, Comets*, or any prodigious *Meteor* than otherwise. Note farther, that *Conjunctions* of those *Planets* in the *Fiery Triplicity*, shews sometimes a *Translation* of one *Monarchy* to another, or a removal of one *Monarch* to another *Kingdom*; and during their *Conjunctions* in this *Triplicity* usually *Comets* appear, as well as in the *fiery*.

Sometimes when they pass through the *Airy Triplicity* they portend much devastation and destruction of such

*Monarchies*

## *Astrological Judgments, 1683.*

*Monarchies* or *Principalities*, which had their Foundation or first Original under the *Fiery*; And *Conjunctions* in the *Fiery Trigon* discover and stir up great *Animosities* and *Differences* between *Christian Kings* and *Princes*; and much affliction usually falls upon their *Kingdoms* and *Monarchies*. Their *Conjunction* in the *Earthy Triplicity* portends much mortality of four-footed Beasts, also great Barrenness and scarcity of the Earth, especially in the sign *Virgo*, but most affliction and destruction to great and small Cattle in the sign *Taurus*, and *Capricorn*; in the last of which they portend much Calamity and Devastation to those Kingdoms, Principalities and Families which had their Original Foundation under the *Watry Triplicity* — If they meet in the *watry Triplicity* (which is wholly Govern'd by *Mars*) they usually portend, not only Wars, but many dangerous and malignant Diseases, Distempers very contagious, in regard of the Signs *Cancer* and *Scorpio*, as also much Cruelty inflicted by the *Turks* and *Mahometans* of that Age upon the *Christians*, &c. and from these brief Rules may be discovered, and collected many curious secrets, whereby the *General Accidents* of the *World* may very notably be *Predicted*, and thus much as to the use of the Foregoing Table.

'Twas well intimated formerly, by the Learned Sir George Wharton (now Deceased) in his *Almanack* 1653. viz. It is good reason (saith he) like as *Rome* was built soon after the beginning of the fifth *Fiery Trigon* (the first being that under which the World was Created) and afterwards by little and little increased, and amongst other Cities the Great Assembly of the Inhabitants, People and Kingdoms she had subdued, bore up her head, till at length about the sixth *Fiery Trigon*, she had reduced very many Kingdoms of *Europe*, *Asia*, and *Africa*, to the form of a *Monarchy* and *Sovereign Empire*, and Flourished in great Glory. And that from thence this *Empire* being divided into two (*East* and *West*) was observed to have fallen to decay, being troubled with intestine Wars, and exhausted by Alienations of *Kingdoms* and *Provinces*, until about the seventh *Trigon*. It was restored

### *Astrological Judgments, 1683.*

stored by *Charles the Great*, and in some sort received its pristine beauty: so shall this *Empire* at this time, (during the effects of this eighth *Fiery Trigon*) sustain great Mutations; and we also conclude, that with good reason it may be so conjectur'd, and *Rome* it self must expect to suffer sufficiently before the effects of this *Conjunction* be expir'd. --- *Tempus omnia revelat* — and this is as great a truth — *Omnium rerum vicissitudo est.*

*Brief Judgments upon the four Quarters of the Year.*

(1.) Of the *Winter Quarter* which this Year commenceth *December* the 11th 1682. 8<sup>h</sup> 51<sup>m</sup> mane. The *Position* of *Heaven* in the *Meridian* of *London* is thus, viz. there are about 15. degrees of *Scorpio* upon the *Cusp* of the *mid Heaven*, and 9. degrees of *Capricorn Ascending*, *Saturn* and *Jupiter* Retrograde near the *Cuspe* of the 8th *House*, the *Moon* just leaving *Virgo*, and entering *Libra*, in square to the *Sun*, and applies to the *Conjunction* of *Mars* in the 8th, and sextile of *Mercury*; The *Sun* is lately separated from a *Trine* of *Jupiter* and *Saturn* just arising above the *Horizon*, and *Venus* in the *Ascendent* in *Aquary* with *Cauda*, as those that please may see, here being no room to insert the Schemes. In the *Full Moon* Preventional, and *New Moon* Postventional, the *Position* of the *Planets* are not much different ——— Now as to the general Judgment of this *Quarter* we also consider the *Configurations* of the *Planets* in each *Month*, and the *Eclipse* of the *Sun* *January* the 17th which begins immediately after 3. P.M. and ends about *Sunset*, and may in part be seen if the *Air* be clear. There is also an invisible *Eclipse* of the *Moon* *February* the first, not considerable to us. So that from a serious consideration of all *Circumstances* we deduce this following Judgment, that there are yet a sort of people amongst us, which remain under as much dissatisfaction as ever — they are and will be still perplexed with doubts and fears; some endeavour much and strive to accomplish their designs, others as vigorously oppose and cross them. The *Moon* doth hast to a *Conjunction* of *Mars* in the 8th *House*, and is in exact *Quadrat Aspect* to the  
Sun,

*Astrological Judgments, 1683.*

*Sun*, they repine and are dissatisfied with the actions of their superiours, and in the Month of *January* (we fear) will in some places of this Nation, or the next adjoining, be peremptorily (if not impudently) active, perhaps to their own confusion — See the Monthly Observations for the Spring Quarter. Many differences very fraudulently and occultly smothered up, and sudden Accusations brought against no mean Offenders: 'tis too frequent in these days, for hot-headed spirits to endeavour to subvert the peace and tranquillity of those Nations they inhabit, and to oppose or abuse the Authority they live under; many other fall into Religious Controversies, or at least make it a Cloak to conceal their occult designs — God bless us from such a reformation that must be advanc'd in the ruins of a well-settled Government and Constitution. For those persons that take delight to broach new Opinions, to introduce strange Innovations, (though under the most specious pretences) cannot wish well to the Church of *England*, or the Government thereof, as 'tis now established, &c.

This will prove a very active *Quarter* in the general, considering the season of the Year. We (shall and) may expect to hear of various turns and overtures in *Mundane affairs*, the weather should be sharp and nipping about the midst hereof, with some high Winds and violent Storms, to the prejudice and loss of those which adventure to Sea, but otherwise, *viz.* (at the beginning and end) much more calm and temperate --- the Diseases will rather augment than diminish, and many of them prove more than ordinary violent, and mortal. --- Now expect to see something of the effects of the *Comets* and late *Conjunctions* of the *superior Planets* break out, perhaps in *Inundations* near *England*, and we have cause to fear a kind of mortality will strangely surprize and destroy many of our own Countrymens great Cattle, as Oxen, Cows, Horses, &c. and the smaller sort will very rarely escape; and thus much for the Winter Quarter.

(2.) In the next place we proceed to the consideration of the *Spring-Quarter*, which this year begins *March* the 10th

at

*Astrological Judgments, 1683.*

at 8<sup>h</sup> 21<sup>m</sup> *mane*, and in the *vernal Figure* we find 3. degrees of *Aquarius* culminating, and 7<sup>d</sup> of the *Twins* *Ascending*, *Venus* is in the mid Heaven in *Aquary*, near the *Dragons Tail*, and in opposition to *Saturn* and *Mars* both *Retrograde* in the 4<sup>th</sup> House. The *Moon* is in her Detriment in the 8<sup>th</sup> separating from a *Quadrat* of the *Sun*, and applying to the same Aspect of *Mars*, who is in Detriment in the sixth — The *Schemes* of the *Full Moon* preventional, and *New Moon* postventional, promise little better, we have also considered (according to our usual Custom) all the *mutual Aspects* of this *Quarter*. From the consideration of the premises with other concurrent Testimonies, we may justly affirm little of good can be expected this *Quarter*, the vulgar sort or common people are still dejected and make great complaint not without just cause; this *vernal Figure* is in many things the same in effect with that of the *Winter Quarter*, and in our Judgment 'tis a sad face of Heaven in earnest, we have the *City Sign* *Ascending* (let the Figure be set by any Tables extant) and *Mercury* Ruler thereof *Retrograde* and *Combust* of the *Sun* — These are Arguments of much sorrow and distraction, all things appear strangely out of Order, and I fear a prospect of nothing but confusion; the *Moon* is in the 8<sup>th</sup> House afflicted, which manifests *Copiam morientium*, abundance of common people, which most certainly must make their *Exit* this Year, and some for want of those things which are necessary for their support: some Authors say, *Per penuriam victualium, per famem, per Pestem, &c.* which I hope may not take effect this year in our Kingdom — and as she is in the exaltation of *Mars*, and hastening to his square, some say, *per cedem*, by the Sword, or by slaughter, but we hope no Mutinies will arise in our Nation. — Four of the Planets in this *vernal Ingress*, *viz.* the *Sun* and *Moon*, *Mars* and *Mercury* are Posited in moveable Signs, and above the Earth, which argues Astrologically, sudden and various Actions when least expected, in things relating to the *Macrocosm*, both as unto great Councils and weighty Affairs, as to Nations and Kingdoms; now considering the aforesaid Position,

*Venus*

*Astrological Judgments, 1683.*

*Venus* with *cauda* in the Tenth, in *Opposition* to *Saturn* and *Jupiter Retrograde* and from *Angles*, shews much Fraud and Disimulation, also clashing and contradictions in most affairs that are transacted near this *Ingress* amongst the *Grandeers* of *Europe* — Many doubtful Accusations and uncertain Informations against great Persons in the Courts of Princes, and those of the highest Quality, or such as have been or are in places of great Trust and Honour — and since the aforesaid *Opposition* is from fixed Signs, we judge the subject matter of accusation hath been long contriving, by fiery spirits, and in the end the Persons not found guilty of those crimes laid to their Charge. Expect much danger of *Mutines*, or at least a strong propensity thereunto may justly be suspected, or some unhappy Insurrection without just cause for the promotion of the same. Many near this time shall act very subrily, and with much craft one against another; also many *Clandestine* and occult Councils purposely to excite people to mischief, but there will doubtless be indeavours used in a great measure to prevent such enormities, and Disturbances — As for the Diseases or Sickneses of this Quarter, *Mars* being posited in the sixth in an *Airy* Sign, and *Venus* also in an *Airy* Sign in *Opposition* to *Saturn* and *Jupiter*, this denotes putrefaction in the Bloud, Pestilential Burning Fevers, Small Pox, Diseases of the Reins, Pleurifies, *Gonorrhoeas*, and all *Venerreal Distempers* in the highest degree. We have mentioned the Diseases of this Quarter, sparingly, but we may all justly fear either the Plague or some Epidemical Distemper too near approaching, either this *Summer* or the next, if God in mercy divert it not; also much Complaint in the City for Trade, strange Animosities and unkind Debates unhappily aggravated; many will be too severe and strict to promote and maintain their Antient Priviledges and Customs as of late they have been, which seems very apparent by the vernal *Figure*, and as to the Weather, that will prove moderately seasonable for the most part during the whole Quarter: and thus I proceed to the consideration,

(3.) Of the *Summer* Quarter which this Year commences

*June*

*Astrological Judgments, 1683.*

June the 11th 11<sup>h</sup> 9<sup>m</sup> mane. In the Scheme of the *Suns* Ingress into the Tropical Sign *Cancer*, there are 18 degrees of *Gemini* upon the mid Heaven, and in our Meridian about 21. degrees of *Virgo* Ascending, the *Moon* and *Venus* in *Taurus* (their own Dignities) in the 9th House, *Saturn* and *Jupiter* in the 11th in *Leo*, *Mars* in *Libra* in the second, and *Mercury* in *Cancer* near the Cuspe of the 11th. The *Moon* defluxes from a *Quadrat* of *Saturn*, and applies to the square of *Jupiter* and *Conjunction* of *Venus*; and thus stands the Position of Heaven at the *Suns* Entrance into *Cancer*, or the beginning of the *Summer Quarter*. 'Tis very observable, that in these three last Schemes of the *Suns* Ingresses into the *Cardinal* and *Equinoxial* points, *Mars* the Ruler of *Aries*, the reputed Ascendant of *England*, is in *Libra* his detriment, w<sup>ch</sup> we fear may influence very unhappy effects amongst us; For it is generally known to all persons that are but meanly conversant in the study of *Astrology*, that *England* from the time that *Ptolomy* lived, hath always been assigned to the Sign *Aries*. (Though some of late would convert it to *Cancer*, we know not upon what ground.) Now if all the Examples of former Ages were lost, we that are now living know that *Saturn* in his Transit through the Sign *Aries* by his malevolent Influence doth afflict *England*, witness the year 1643, 1644, and 1645. as also in 1672, 1673, 1674. &c. and now *Mars* the lesser Malevolent Planet (but as violent in operation for the time) his eight Months Transit through the opposite sign *Libra*, will too certainly 'tis to be feared, disturb our Nation in one kind or other — Now or near this time expect stupendious Councils, and very mutable Actions of great concernment in hand, in the *Macrocosm*, and they will be manifested partly in civil affairs and common Transactions, and partly in *Martial* concerns, and this perhaps suddenly when least expected — Also Dissolutions of great Councils, breach of Leagues and Friendship, upon the least occasion given. Moreover we may justly fear (and certainly expect) many Sicknesses, and those more than ordinary Favours of all sorts, and some of them extream violent and dangerous; once more  
we

we pray God to deliver us from a *Plague*, but we desire not to affrighten the People, nor dare not be positive, we only make our probable (and rational) conjecture — The Merchants may this *Quarter* expect good News and hopeful Returns to their great incouragement and satisfaction; the Weather proves extream hot, and the *Air* dangerous and unwholesom. Let every body that prizes his health indeavour to antidote himself against Infection. --- There is an invisible *Eclipse* of the *Sun* in this *Quarter*, not mentioned by *Argol* or any other, in 2. degrees of *Leo* *July* the 14<sup>th</sup> about two in the Morning. There is also in this *Quarter* another *Eclipse* of the *Moon* *July* the 28<sup>th</sup> about eight in the Morning seen by our *Antipodes*, both which being invisible in our Hemisphere, we shall take no farther notice of them; But proceed to the Judgment,

(4.) Of the *Autumnal Quarter*, which this Year begins *September* the 13<sup>th</sup> 2<sup>h</sup> 39<sup>m</sup> *mean*, at which moment of time we have 12. degrees of *Taurus* culminating, and 25. degrees of *Leo*, or the place of the *Lyons heart* *Ascending* in our *Horizon*; and *Saturn* posited therein, *Jupiter* is now in his detriment in *Virgo*, near the Cusp of the second, *Venus* in her fall therein, the *Moon* in *Scorpio* in the third, and *Mars* now in *Sagittary* in Opposition to *Londons* Ascendant, the *Moon* separates from a Sextile of *Saturn*, and applies to a Sextile of *Jupiter* and *Venus*; as those that please may try — and thus stands the Position of Heaven at the *Suns* Ingress into the *Aequinoctial* point *Libra*. And in our Judgment it is a very dejected Position of the Heavens, where all the Planets are *Subterranean*, and five of the seven (at least) extreamly debilitated. This portends much sorrow and no less affliction to the people in general. All things seem now at a stand, for the Angles are all fixed; 'tis a sad mournful time in earnest, and much News arrives from Foreign parts, of as casual Accidents there, as can possibly fall out amongst us the People of *England*, and amongst the rest we may take into the Catalogue,

## Astrological Judgments, 1683.

Catalogue, France, Poland, Denmark, Sweden, Spain, Holland, Germany, Italy, (and therein his Holiness,) Constantinople, and the Turk himself, Hungary, City of Venice, cum multis aliis, are menaced more or less this Summer, but in what kind we shall not adventure positively to determine. All we shall say is, *Tempus declarabit omnia* — There will happen many Controversies between man and man, and the like Contentions and Debates between Nation and Nation, one Man, one Nation or Kingdom, shall be animated and stirred up to quarrel and contend with another — and in this Quarter we may expect frequently much Cloudy dark Weather, and as Cloudy and obscure Consultations — no great Unity between Princes and their Subjects, nor betwixt the People and their Magistrates — a general dissatisfaction and repining, much Sickness and Mortality, and sad Calamities of that Nature, yet notwithstanding all sadness, we may expect many abusive Pamphlets, both in this and the former Quarters, also much robbing both at Land and Sea — Many dissensions will be fomented amongst us, and the same amongst the Conclave of Cardinals at Rome; Religion is more than ordinarily controverted, also Tender Consciences must suffer, — and such will be the vain glory and sawciness, or Pride of many ordinary persons, that they will slight and affront their Superiours in those places where they live. *Sed motos præstat componere fluctus.* It were better such busy persons would be quiet —

Many other things we had prepared to present the Reader in this Years *Anglicus*, (the famous Year 1683.) which could not conveniently be brought in to these our limits, except much of this matter and Predictions had been excluded, which could not well be, and therefore we will reserve them (God willing) till the next Year, and here conclude with the Poet, *viz.*

*Time whilst we speak on't, flies;  
Now banish sorrow,  
Live well to day, and never  
Trust to Morrow.*

## JANUARIES *Observations*, 1683.

*Sors omnia versat.*

**H**ere's no constant satisfaction in this Region of vicissitude. This Month produceth many needless Consultations and Debates, also contradictory Councils and Disputes, whence little or nothing of good to the publick may be expected, especially the latter part hereof; yet certainly many great things are in agitation and under serious consideration, as will appear in a short time— But turbulent Spirits will now shew themselves Active to purpose— and amongst the rest, some secret Plot or pernicious design should about this time be hatching— Let such evil Agents know, *That Presumption is the Harbinger of Destruction.* Here's a violent storm impending, and woe to those People in *Europe* on whom it doth fall— The Divine hand of Providence divert it from *England*, even to the remote parts of the Earth— Much Contention and Division too frequently breaks out amongst us; for *Opposite Aspects* or Configurations of the *Planets* seem to presage no less, which by a secret influence elevates the spirits of no mean Persons to a great degree of Animosity and Passion; and if so, little of *Harmony* but much of *Discord* may rationally be expected. Variety of News arrives this Month, but much of it admits of contradiction. The winds rise high and very tempestuous weather may follow, in many places; and 'tis to be feared much damage at Sea, or some sudden Inundation now or near this month may casually happen. *Quod tibi vis fieri.*

# February hath xxviii days.

## FEBRUARIES *Observations*, 1683.

*Fiat Justitia.*

**E**Ndless Debates usher in the Month, for the Configurations of the last have powerful Operation in this; A self-conceited Pride rules in every breast, and few men will easily forsake the conceits of their own Brains— The late visible *Eclipse* of the *Sun*, and the second *Conjunction* of *Saturn* and *Jupiter* in *Leo* must certainly leave some considerable Impression upon Mortals— All *Europe* in General is menaced in one kind or other, and the two late *Comets* appearing so soon after each other must undoubtedly have prodigious Effects as our own experience has, and may sufficiently verify. Many hot brain'd persons make it their business to divide the most hopeful Councils now on foot; others endeavour to foment Mutinies amongst the vulgar sort. *Italy* should be in, or near strange confusion; *Holland* and *Scotland* very uneasy. Discords to a great degree amongst persons of Eminency, Quarrels, Duels, and Robberies on Land, and some Pyracies at Sea. Plenty of News arrives from Foreign Nations of very Notable things now transacted. The Merchant receives prejudice amongst many others, and the people in general as full of fears and complaints as ever, and yet some worthy and deserving Person amongst us, is advanc'd with a general applause— others are Accused and discarded— Now the little *shrub* contends with the lofty *Cedar* for supremacy— But we all know that the humble *sheep* can never rest securely whilst the devouring *Wolves* are at liberty— great expectations of some notable thing to break out, and the month produces much more pleasing News towards the conclusion thereof than at the beginning. *Post tenebras spero lucem.*

March

March enters with brisk gales of wind, and a kind of turbulent season, and confirms the Proverb of coming in like a Lyon and going out like a Lamb. It begins not only with high winds but Rain or Hail, also with cool Mornings and Evenings, and probably some Frost; the midst affords no great alteration, and ends moderately.

# March hath xxxi days.

1	d	David Bishop. Sun rises 22 m. p. 6, sets 38 m. p. 5.
2	e	Full Moon 20 min. past 11 at night.

## MARCHES *Observations*, 1683.

*Pax optima verum.*

Nothing becomes Authority so well as a grave and sober Moderation. But busie spirits will endeavour, about the beginning hereof, to promote Sedition in earnest— Let such persons beware, for they will assuredly find Misery in the end— About this time we may expect to hear of the great indisposition of an Eminent Lady amongst us, or she labours under some deep Melancholy and discontent of mind, which may bring her Body to the Grave, and will be much lamented by most of her Friends and Relations. We have a season very uncertain as to weather, and we may now expect to hear of as strange, sudden, and unexpected Actions in many Kingdoms and Countries of *Europe*— God grant there be not an appearance of some Epidemical Disease, which may too much afflict mankind— The latter half of this Month is taken up with very sober deliberate Counsels tending to the healing of Breaches and composing of differences to good purpose, and this work is prosecuted very effectually to the Honour of those Noble Hero's that appear more than Ordinary active therein; All men know that the Common people judge of persons and things by the issue and event; and we may daily experiment this truth, That their Love is violent upon a flourishing object, and their hate as cruel to them whom adverse fortune hath eclipsed or overthrown— The Opposition of the *Sun* and *Mars* at the end hereof presages much danger of a *Catastrophe* in the Honour and Dignity of a very popular person amongst us. *Reddite que sunt Caesaris, &c.*

The Month begins with change of weather upon the Full Moon, which may be more or less violent, and afterwards more calm and pleasant for a short time, which will soon change to Rain, and brisk cooling gales with some intervals of another kind, viz. more warm and pleasant, and in general, right April weather.

# April hath xxx days.

## APRILS Observations. 1683.

*Est Natura hominum novitatis avida.*

**R**eligion is the best ground of a familiar Society. But the greatest professors thereof are subject to differ amongst themselves and raise unnecessary Controversies and Disputes about this time, ♀ and ♀ are now become *Direct* and hasten to their third *Conjunction* in the Sign *Leo* (through which the last Comet in August did pass) but they first meet with the *Quadrant* Aspect of the Sun. The Pope of Rome should be now in a Melancholy fit, and very uneasy and timorous, perhaps the *Conclave* of Cardinals slight or affront him, or some of his own Sons of the *Catholic Faith* prove Disobedient—The *Dissenters* in general are Discontented, and those of the *Rural Order* find cause enough to complain—Sober and deliberate Counsels vigorously carried on, and we may hope to good purpose. Let Scotland and Holland act warily: *Bohemia* is menaced with great affliction approaching; and *Italy* is also strangely threatened, for many are the configurations of the Planets, both in the last year and this, of very dangerous consequence to that Nation, if *Leo* be their *Ascendant*, as undoubtedly it is, as certain as *Aries* is the *Ascendant* of *England*, and *Gemini* the *Ascendant* of *London*—God preserve us from an untimely mortality, for a *Plague* or *Pestilence* may now or near this time be feared to break out in *England*, especially in the Oriental parts thereof, unless God in mercy defer it to future years—Still we must expect to hear of many difficult debates, also strange difference in Judgment in matters of Religion and breach of Friendship, &c. And we have reason to fear an unwholesome Season or infected Air, which may strangely corrupt the Bodies both of Man and Beast. Strange affronts and abuses thrown upon some Eminent persons amongst us, and the people in general possessed with turbulent fears—Abundance of Intelligence from most parts of *Europe* this Month. God direct our Governours in their great and serious Councils, and (prevent or) compose those Domestick Divisions which now seem to be strongly aggravated—Our passions turn us round in a perpetual Circle of vicissitude, and our own thoughts are the Mould in which we cast the model of our happiness—  
*Quot homines tot sententie.*—

Moderate good weather, with cooling gales of wind, and now and then a pleasant shewre of Rain, which continues, not without frequent and sudden alteration, sometimes extream hot, at other times cold for the season; and the whole month in general should produce much variety, with Wind and Rain sufficient.

## MAYS Observations. 1683.

*Finis coronat opus.*

Y<sup>O</sup>ung people this Month must expect to be most afflicted with Diseases, for the Superior Planets do very much impede or afflict the Inferior at the beginning hereof. This should prove a Month of much Action for many and various are the configurations thereof. *Turkie, Tartary, Muscovia, Bohemia and Westphalia, &c.* are not idle, 'tis now time for those people to look about them, and cry out *Armes, Armes, &c.* *Rome* and some prime or principal places in *Italy* are awakened, and in deep consultation—Some are apt to mutiny, and in fine we may suddenly expect to hear of very strange Actions in some of those Countries aforesaid—The third and last *Conjunction* of the Superior Planets is celebrated this Month, and now let us patiently wait to see the effects thereof, which at present may be sudden and various Actions, when least expected, in things relating to the *Macrocosm*, both as unto great Councils, and weighty affairs of Nations and Kingdoms—but we in *England* continue yet in Peace and are like so to remain in a peaceable condition under a prudent Prince, nor have we the least cause to fear the attempts of a Foreign enemy, either by *Invasion* or otherwise during his Reign—which God grant may be long and prosperous—We hope the City of *London* may continue yet moderately free from Casual Accidents, either Sicknes or Fire; as also from any Action which may offend or disoblige his Majesty—Towards the end of this Month 'tis very probable that an *Ambassador* may Arrive, or some *Agent* or *Missive*, to congratulate our Sovereigns; and at the same time many worthy persons are prefer'd to places of great trust and advantage, and can by experience testifie that the way to perfection is to change for the better—whilst others to their prejudice are strangely overwhelmed with their own Curiosity—The Merchants are in great expectation of hopeful returns, which near about this time they may be made happy withal, the weather is moderately seasonable this month, and the painful Husbandman is thereby encouraged—other things might be intimated—*Sed—Cynthia aurem vellit.*

# June hath xxx days.

## JUNES Observations. 1683.

*Fœlix quem faciunt aliena pericula cautum.*

**C**Hange and decay are the elements of every State and condition. The world is like a Lottery, where a man may be made or undone in a moment. Here appear strange heats amongst some of the *Grandees* of Nations at the beginning hereof, whence arises a strong inclination to Mutinies and Insurrections— The *French* King is very Active, and many other Princes of *Europe* appear as vigilant in taking new measures for preservation of their Interests— Men of contrary Judgments appear very vexatious to each other, and those that enjoy the greatest plenty (for Subjects) of this worlds wealth are strangely uneasy, and torment themselves in contriving the preservation thereof— Could men but entail their Vertues with their Estates, we might then expect no small number of glorious Saints amongst us; and 'tis as certain that if *Vice* were Hereditary, that wickedness would almost infinitely increase also— The *Planets* are now all *Direct* in Motion, and aptly signify the celerity and activity of the Princes of *Europe*, in making preparations and provision, both of Money and Men, to defend themselves against all Opposition, for War-like Actions are daily expected amongst them, both at Land and Sea— and yet *England*, we hope, remains unconcern'd; God preserve us from sickness, and all Calamities of that nature, and then let us endeavour to agree amongst our selves, and we shall of all Nations in *Europe* be the most happy— The tedious transit of *Mars* through *Libra*, (*viz.* near eight Months) there in Opposition to *England's* Ascendants, is very considerable, and worth the Observation of the Curious; we hope his Influence may not have any malevolent effects amongst us, in regard he is much debilitated there; but to such persons that have *Libra* or *Aries* Ascending— we only say— *Cavete*—

## JULIES Observations. 1683.

*Consilium malum consultori pessimum.*

OUR Affections are poiz'd with the weights of self-love and ambition; and our best services are of little worth, if not seasoned with truth and discretion — The Month begins moderately well, and some fiery spirits that were lately in great passion, are now somewhat allayed, and appear not so violent, but with much mildness, or at least seemingly so — However, we may expect very sharp *Libels* or *Pamphlets*, secretly dispersed abroad, to abuse Authority or some persons of Note amongst us — The Planet *Mars* after at least two hundred days continuance in the *Celestial Ballance* doth now change his station, and is presented in another *scene*, viz. the *Hectorian Sign Scorpio*: certainly the *French Monarch*, for many Months last past, has had small cause to boast of Success in his attempts, and now he begins to proceed with new resolutions; of which shortly we may rationally expect a notable Account — As also of some Rancounter or Opposition of part of his Army, with those as valiant and active as themselves — The *Turkish Forces* are very active against *Hungary*, and some other of the *Emperors Territories*: the *Brutish Tartars* are ambitious of Plunder and devastation. All men are in great expectation of some novel thing to break out — we hope no more Plots to torment us — some would be *Cæsar aut nihil*, they are too ambitious and aim at great things — yet still we have just cause to fear a very sickly time in many places of *England*, viz. *Pestilential Fevers*, *Agues*, *Small Pox*, and other Diseases very hard to be removed — We must patiently submit to the Divine hand of Providence, for nothing puts men so much out of humour as Discontent — yet of all afflictions Poverty is none of the least, which to some is more terrible than Death it self — *Tribulatio homines ad Deum convertit* —

This Month begins with some notable change of weather, viz. Rain and Thunder and conculcations in the Air, and frequently is attended with sudden storms of Wind and Rain, perhaps more than expected; nay I may presume to predict more than ordinary. In fine, variety of weather will happen through this month.

# August hath xxxi days.

1	C	Lammas.	Sun rises 39 m. p. 4, sets 21 m. p. 7.
2	D		
3	E		
4	F

*Non omnis Moribus ad Mortem.*

**L**earning makes us men, Philosophy more than men, Divinity Saints, and yet there are too many amongst us, that despise and contemn the Honourable and Learned Clergy— *Jupiter* now leaves the Regal Sign *Leo* and enters into *Virgo* his detriment, and there meets in combustion of the *Sun*, and presages much prejudice to some of the long Robe— *Saturn* doth also meet in Combustion with the *Sun* at the beginning hereof, and the next Month changes his Sign also; so that many aged persons are hereby summoned into the other world, and doubtless within few months we shall hear of several eminent (as well as aged) persons in many places of *Europe*, that are removed by the King of Terror into their cold Tombs, (a Debt that must certainly be paid by all Mankind, or else we should be most miserable Creatures)— There are many notable Configurations this Month, and amongst the rest the *Quadrat* of *Saturn* and *Mars* is very considerable— and will foment great Divisions at *Rome*— Some eminent Person is in great danger of a Scab or Pox; He should be of a Martial Spirit, and in all probability one of our own Nation— Many surfeit themselves by Drinking and Debauchery, and very rarely recover again; others are engaged in Duels and Quarrels of dangerous consequence. Many Complaints arise, much Sickness, Poverty, want of Trade, *cum multis aliis*: Let the Guardian Angel of the City of *London* ever protect those her numerous Inhabitants from Plague, Pestilence, Fires, Poverty, and all other Mortal Calamities whatsoever.— The Month ends with unwelcome News, being the product of malevolent influences: God preserve our Merchants Ships, that they may make a happy arrival from the *East Indies*, and many other Parts of the World— *Pericula maris spes lucri superat.*

# SEPTEMBER'S Observations. 1683.

*Felix qui potuit suam agnoscere Causas.*

**E**vil Communication corrupts good manners: This is a certain Maxim we all know; therefore let every man act for himself, and avoid the insinuations of such subtil Agents that delight to insnare the Innocent, to promote their own evil designs— Such persons we shall find will be sufficiently active this Month, but few of them will be so happy as to accomplish their crafty ends— The Courts of Judicature find molestation by tedious and troublefom Law-Suits, which too many delight in— Some Difficulties arise in the Councils of Nations— and the Country-man complains of unseasonable Weather, and other cross occurrences in his Rural Affairs— yet about the beginning hereof some worthy Lady amongst us is advanced by an Honourable Marriage, and Preferment is preparing for some worthy Martial Spirit— *Mars* is now in Opposition to the City of *Geni*'s Ascendant, We wish most heartily it portends no unhappy casualty unto her worthy Inhabitants, by the heats of passion and private interests, whether in the Election of Magistrates, or otherwise— The *Quadrat* Aspect of *Mars* and *Jupiter* seems to aggravate the danger— Much discontent and repining amongst the vulgar sort, some are rewarded with strict Confinement for their seditious Expressions, others for promoting Division by scandalous, false Information and Intelligence— but about the Close of the Month there appears a better understanding, and the truth is discovered by undeniable Evidence, and lastly good News arrives to the Industrious Merchant. *Plus minarum quam periculi*—

Moderate good weather and warm for the season, which continues for the most part to the New Moon; and then expect cold blasts, and a little moist weather, rain or snow, but so gentle that none need complain, for in the general this month should produce very seasonable grateful weather both to City and Country.

# OCTOBER'S Observations. 1683.

*Sub Judice lis est.*

**Y**OU that love and honour your King and Countrey, now act your parts in your particular places as occasion requires— The *Doctrin* and *Discipline* of the *Church of England* is such as was established by *General Councils* and *Synods*, and afterwards confirmed by the *Laws of the State*. *Unity* and *Uniformity*, *Necessity* and *Order*, *strength* and *beauty*, are the *Ingredients* of the *Protestant Religion*— and who can but love such a *Composition*, as 'tis now established— The very *Name* of *Papery* seems odious, and is more and more detested— we have great hopes that now things are well composed, and put into a very good *Order*, to the general satisfaction of the whole *Nation*. But from *Italy* expect to hear of many *Divisions* amongst the *Religious*, whether *Cardinals*, *Abbors* and *Bishops*, or other *inferiour persons* in that *Nation*— Now is the time that some considerable matter of great moment is near manifestation— The *Configurations* of the *Planets* this *Month* are all *benovolent*, and therefore we may *rationaly* hope for much *Unity* both in *Councils*, of *Nations* as well as amongst the *people* in *general*. Now we may also expect *pleasing News* from *Foreign Parts*, Since the *Heavens* are so *harmonious*, let us therefore *rejoyce* and be *thankful*, and pray to the *Almighty* to divert his *Judgments* which are *impending*, of which we have lately had so many *Monitors* to give us *warning*, as *Comets*, *Conjunctions*, and many *prodigious Sights* in the *Air*, &c. Many are doubtless afflicted about this time, especially the *vulgar sort*, with *grievous Maladies*, and 'tis to be feared there are many more to come.

*Deus avertat*—

This month produces very seasonable and good weather for the  
soft part, for at least the first half thereof, then the winds begin to  
blow, and may blow up a little Rain, or Snow, but not violently, also  
old Mornings and Evenings, perhaps some little Frost, but in the  
general, mild for the season.

# November hath xxx days.

1	d	Last Quarter 2 m. p. 10 at night. <i>All Saints.</i>
2	e	Sun rises 36 m. p. 7, sets 24 m. p. 4. <i>All Souls.</i>
3	f	
4	G	22 past Trinity.
5	a	<i>Gun-Powder-Treason.</i>
6	b	
7	c	
8	d	New Moon 26 min. past 1 afternoon.
9	e	Day about 8 hours and a half long.
10	f	Sun rises 48 min. past 7, sets 12 min. past 4.
11	G	23 past Trinity. <i>Martin.</i>
12	a	Days shortned 8 hours.
13	b	
14	c	
15	d	First Quarter 25 min. after midnight.
16	e	
17	f	
18	G	24 past Trinity.
19	a	<i>Elizabeth.</i>
20	b	Sun rises at 8, sets at 4.
21	c	
22	d	
23	e	Days shortned 8 hours and a half.
24	f	Full Moon 42 min. past 1 in the morning.
25	G	25 past Trinity.
26	a	
27	b	
28	c	<i>Term ends.</i>
29	d	
30	e	<i>St. Andrew Apottle.</i>

# NOVEMBERS Observations, 1683.

*Non nobis nati sumus.*

**W**E are all too apt to dispute for a Priviledge of revenge, and every man would have the power of a King at least within himself—which is very unreasonable to be hoped for. Perhaps some Monsters in the habits of Religious men may appear this Month, and broach strange kind of Doctrine, against the Government, in their pitiful nameless Pamphlets: Let such persons be careful what they do, for their persons and purses must certainly pay for such offences.—This will prove a Month of notable Action, and we hope to the general satisfaction of the whole Nation—Amongst the rest some receive Preferment, others are found guilty of such crimes as they cannot justifie; and so are fairly discarded from their places of Trust and power: for now notable Inspection is made into the late Actions of some eminently noted persons amongst us—Dubious advice comes from some Neighbour Nations, and yet there are very considerable matters relating to our own Nation now under consideration—We wish our Governours (or Representatives) had *Argos's* eyes that they might more narrowly search into many weighty matters that have long been concealed, & call such busie persons to an account that have taken the boldness to abuse the Nation without controul, with much confidence & no less impudence, and still persist as if they were protected from all danger that may occur— But certainly vengeance is preparing for the perfidious, & those that are guilty of Treason, destruction will suddenly overtake them.— *Mali sunt homines qui bonis dicunt malè.*

# DECEMBERS *Observations*. 1683.

*Contentiones fugiende.*

**L** Ove one another, is the great Commandment ; which if it were observed amongst us, no Nation under the Sun could be more happy — But we fear *Satan* is made Privy-Councellor to the present actions of some wicked Agents, who make it their business to sow the Seeds of Division, openly abuse the Government, foment Treason, encourage the people of the Nation to mutiny and such like Hellish actions — About this time we may expect a happy discovery of these matters, and some of their Promoters — who would level Mountains, if 'twere possible, and elevate the lower Grounds — Let such receive the just reward of their deserts — We of *England* are in as hopeful a condition, could we but see it and be thankful, as any Nation in *Europe* ; and our Persons, Estates and Liberties are safe and secure under a most Gracious King, who is at present in amity with all the World ; God preserve Him in health and strength, that he may many years rule and govern us in that happy tranquillity we now enjoy. *Amen.*

The *Configurations* of this Month (unless at the beginning thereof) are for the most part very benevolent, and therefore we may hope well, we are now under more powerful influences ; and what their effects will be, 'tis time must make manifest. In the precedent Judgments at the beginning of this *Anglicus* we have offered at some things which probably may happen according to the Judgment of Authors, and some late years experience — Let us endeavour to prepare our selves for all changes, and the worst of times that can happen — casting our selves upon Providence, and not torment our selves with vain fears, as people without hope — for if God be for us, who can be against us — *Eiat Dei voluntas.*

**T**He true *Elixir Proprietatis*, and its perfect use in most Diseases, viz. Gripping of the Guts, small Pox, putrid Feavers, Wind and Vapours, &c. is composed and sold at the sign of the *Van Helmont* on Great Tower-hill, near the Chain, by *Crutcher-Fryars*; also at M<sup>r</sup> Robert Horn's shop at the South entrance of the Royal Exchange; at Mr. John Lawrences at the Angel in Cornhill near the Royal-Exchange; at M<sup>r</sup> Hancocks at the three Bibles in Popes-head-alley; at M<sup>r</sup> Brewsters at the Crane in S<sup>t</sup> Pauls Churchyard; at M<sup>r</sup> Playfords Stationer in the Temple; at M<sup>r</sup> Lounds Stationer against Exeter House in the Strand; at M<sup>r</sup> Gazels at the Faulcon in Westminster-hall; at M<sup>r</sup> Cooks at the Tabaco Rowl and Spur at the corner Shop in *Lincolns-Inn-fields* near Turn-stile-alley, Holborn. All persons are desired to be careful they buy not the Counterfeit, the best is only to be had at the places above mentioned, and no where else: With a printed Book of its vertues, and directing fully how to take it.

**B**UCKWORTH'S LOZENGES, Famous for the Cure of Coughs, Colds, Catarrhs, Hoarseness, &c. Being also a great Cordial and a Sovereign Preservative against all contagious Distempers, Malignant Air, and unwholesome weather; well approved of by the chief Physicians of the Colledge, to whom the true Receipt hath been communicated by the Publisher hereof; are now more faithfully prepared than since the Authors Decease, and are Licensed for publick use and benefit, by Sir John Mickelthwait President of the said Colledge, London. Being rightly prepared only by James Ship-ton Apothecary, at the Crown in Hatton-Garden.

**T**Hose highly approved, and only true Spirits of Scurvy-Grass, both Plain and Golden, famous for their admirable Cures in the Scurvey, Dropsie, and several other general Distempers, are exactly and faithfully prepar'd, and sold by the first Author, Robert Bateman, at his House in Pauls Chain, near Doctors Commons, London; with printed Directions for their use. The Bottles are seal'd with his Coat of Arms, The Half Moon and Ermins, to prevent Counterfeits. Price one Shilling each Bottle. These are the true Spirits notwithstanding all the late pretenders thereto: Therefore let all persons beware they are not cheated with those upstarts.

## Advertisements.

**A**LL sorts of Chymical Preparations are faithfully prepared without the least Sophistication or Adulteration, and to be sold at reasonable rates by Christopher Pack Chymist at the Globe and Furnaces in the Postern, by More-gate, where a Catalogue may be had gratis.
